Greetings to all BSF,

My name is Gisel Garcia, I am 24 years old and I graduated as a Language's Teacher on UABC University in 2020. I am currently working as Human Resources assistant on a Call Center, this job is not related with the career that I studied but I like the work that I do there. In the time that I have been working there, I have learned many things and I believe that it has helped me on my personal growing too.

On this job, I have to use English every day, since the work tools are on this language and the personal that works there feels more comfortable using it. I have to create the files for the new hire employees and explain the information of the company to them. In addition, I am in charge of receiving the clients of the companies associated with my work, register and explain to them the policies and rules of the company and many other things. There is a lot of work to do every day.

Making comparison with the previous jobs that I had, this is the one that I had liked the most. Even so, I do not intent to work in the same position for the rest of my life; I want to grow to a better position, and someday work on a job that is related to my personal likes and hobbies, something that I enjoy and makes me happy. My main reason to work hard every day is my family; they have always been my motivation to improve myself.

I will always be thankful to BSF, because you helped me to complete my studies and supported me to become the person that I am now. Thank you so much to all of you. God bless you always.

Hugs,
Gisel Garcia.

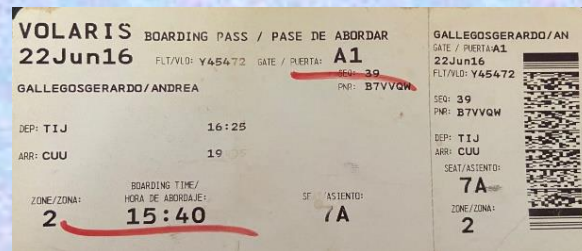

Hello! My name is Andrea, and I'm a lucky BSF graduate.

I remember the day when my Dad came home and told me "Hey little daughter, you need to write a letter talking about yourself and explaining who are you and who you wanna be at the fututre" and I said "ok, no problem, I'll do it right now". I remember that moment like it was yesterday. There's no doubt that the time goes fast. Many years later I'm writing from the future that I some day dreamed about, or think it like a posibilite.

I'm graduate from Music Licenciature. Funny Story... When I said the first time to my parents that I wanted to study music as a career, they told me "are you shure? You're shure that you wanna spend an scholarship on that career?" and I said: YES!

So a flight to Chihuahua when I was only 19th years old, to study Music. I still have the ticket of that fligh.

That was the first time that I treveled on a plane. And I was doing it by my self. My parents couldn't fly with me on that moment.

Have arrived to a completly unknown city was kind of hard because I was far away from home, family, friends and as a plus, I didn't know how to cook or how do to loundry, so I also learned that. I had arrived to a city where I didn't knew anyone. I was all by my self. Was hard, but not imposible. I knew that I'll made it. And I did.
